

MANDATORY INFECTION CONTROL COURSE

MANDATORY FOR DOCTORS, INTERNS, RESIDENTS & NURSES

The goals of infection control training are to:

- Assure that health professionals understand how bloodborne and other pathogens can be transmitted in the work environment: patient to health care worker, healthcare worker to patient, and patient-to-patient
- Apply current scientifically accepted infection control principles as appropriate for the specific work environment.
- Minimize opportunity for transmission of pathogens to patients and healthcare workers.
- Familiarize professionals with the law requiring this training and the professional misconduct charges that may result from failure to comply with the law.

Completion of this course will fulfill the regulation imposed by the NYS Department of Health
